What it does...

Music teachers are busy working preparing lesson plans, rehearsing, performing, and going to teachers' meetings. In addition, they are expected to present professional conduct, develop student talents, arrange student performance events, maintain accurate student records and prepare statements for payment.

This is precisely why TimeSig Studio Management System was developed by a team consisting of a software engineer, a piano teacher, and an accountant.

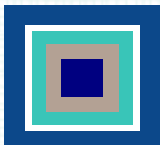

We have heard you! Consider TimeSig to lift the burden of needless paperwork.

The Developers

Mary Lou Iverson, NCTM

Air Kaplan, Software Engineer

Jerry Iverson, President HDS Accounting Firm
